New Trombone
Eliminates
Musical Hazards

—Central Press Canadian.

THIS IS NORTH AMERICA, TOO—Host waves, drought, rain or balmy breezes may be the lot of most of the inhabitants of North America, but in Alaska soldiers in training are experiencing more and cold. At Fairbanks, U.S. soldiers, holding mock attack, use regulation white camouflage coveralls as they advance through the crisp, new snow.

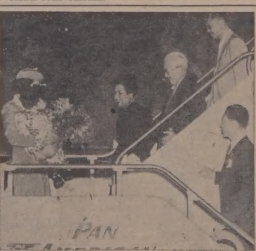

QUAKE HITS CALIFORNIA AGAIN—The force of the double earthquake that hit Bakersfield, Calif., is manifest in this view of the city's main street, covered with rubble and fallen bricks. The tremors claimed two—and probably four—lives. At least 23 persons were injured, four seriously. The earth's wallop was the second to hit the South-Central California oil and agricultural centre in a month.—Central Press Canadian.

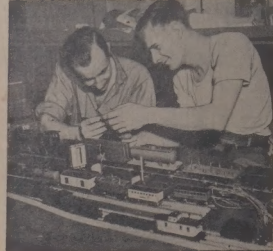

NATIONAL HEALTH INSURANCE PLAN IS STRESSED AT TLC CONVENTION—A national health insurance plan is the keynote of the Trade and Labor Congress of Canada's 87th annual convention now underway at Winnipeg. The 500 labor delegates, representing 322,000 members, quickly and vigorously supported recommendation that congress insist the government enact a contributory health plan to provide medical, surgical, optical, physiotherapy and dental treatment and appropriate hospital and nursing facilities. The congress is believed to favor a plan similar to that operated in Britain, with the freedom of patients to choose their own doctor. However, the details of the proposed health plan were not spelled out by the TLC, whose president, Percy Bengough, second from left, and vice-president, William Green, (right), are seen welcoming Arthur McNamara, (left), deputy minister of labor and Labor Minister Gregg, to meeting.—Central Press Canadian.

NEW TROMBONE ELIMINATES MUSICAL HAZARDS—David Shuman of Brooklyn, N.Y., is seen demonstrating his new trombone that silences sidings. The inventor of the unique design, and a faculty member of the Juilliard school of music, Shuman revealed that the reason for the sidings' design is to enable boys to study the trombone at an early age. He explained that young musicians have to stretch their shoulders to reach the lower positions on the standard trombone, but that his trombone, which angles off to the right, requires less effort to play because it shortens the arm movement required for the lower positions. Also, a trombonist won't knock over the music stand when he reaches for particularly difficult notes.—Central Press Canadian.

MEDICAL CARE BRINGS MADAME KAI-SHEK TO U.S.—On her first visit to the U.S. in the past four years, Madame Chiang Kai-shek, wife of China's Nationalist leader, is seen receiving a bouquet of flowers from Broadway-old Madame Chen. At the arms of her stewardess following her arrival in San Francisco, Cal., hundreds of her countrywomen were on hand to welcome Madame Chen, whose alleged purpose in coming to the U.S. was to receive treatment for skin disorder and not to grind any politics.—Central Press Canadian.

—Central Press Canadian.

OFF-DUTY RELAXATION ABOARD Nootka—Petty Officers Bob Honour, (left), of Portboro, Ont., and Ernest Slesky of Brynfield, N.S., and Oshawa, Ont., are seen working at their favorite hobby during their off-duty hours while serving with the United Nations naval force in Korean waters. Both are crew members of the Canadian destroyer, H.M.C.S. Nootka, engaged in her second tour of duty in the Far East.

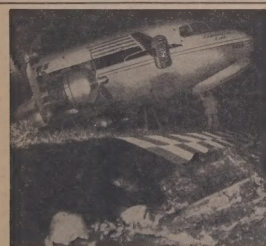

MEN FAIL TO QUELL FRENCH FIRE—Using a pack-type extinguisher, a volunteer fire-fighter does his bit to stem a raging forest fire in the woodland region of Auvergne, France, that has made hundreds homeless. A truck, caught in the path of the flames, has gutted at the roadside. More than 100 square kilometers of crops and forest were destroyed before heavy rains enabled firemen to bring the blaze under control.—Central Press Canadian.

—Central Press Canadian.

SEE DREAM REALIZED WHEN OLD BRIDGE COLLAPSES—Half of a 40-year-old \$100,000 steel bridge which carried traffic into Espanola, Ont., is seen lying in Spanish River after it had collapsed. A giant tractor-trailer on the span at time was thrown into the river but the driver, Clark Cameron, of Espanola, and a passenger escaped serious injury when they managed to swim ashore. One of the most heavily trafficked bridges in the Manitoulin area, the Spanish River bridge, in addition to heavy commuting traffic, carries a large number of tourist cars. The collapse brought great satisfaction to many Espanola residents who have been agitating for a new bridge for many years as an old one was considered a hazard.

STOPS THREE FEET FROM DISASTER—Tens of thousands aboard this passenger plane were 36 inches from disaster as it rolled to a stop at La Guardia airport, N.Y. The plane stopped 36 inches from a seawall after it rolled off the end of a concrete runway.—Central Press Canadian.

WESTERN INFLUENCE IN JAP FESTIVAL—Influence of the West in Japanese festival shows in that kind of beauty queen at the celebration at Yaguhara beach marking the end of the summer holiday season. Commemorative travel to turn the festival into a "peace demonstration", but could stir up no enthusiasm among the crowd.—Central Press Canadian.

—Central Press Canadian.

TV FOR THE BLIND—The New York panel for the Jewish kind of America has introduced a screenless television set for the country's 200,000 blind people, many of which have expressed the desire to become familiar with the world of television. The newly-developed screenless TV set will allow these people to hear the sound of television. The small portable set, seen being turned up here by its inventor, Bernard M. Rebe, blind librarian and Braille instructor at the blind, contains both a television audio receiver and an FM radio receiver. Measuring only 12 x 4 x 8 inches, it also contains control knobs described in Braille.

ALL-TIME RECORD FOR RAY OF QUINTE—Largest fan on record ever taken from Ray of Quinte, Ont., is this 21-foot diameter aluminum caught in a net by Clarence Allen, (left). The big fan was hauled into Allen's commercial fishing boat by the hull. At current prices it should bring Allen over \$100.

WHERE GAVE EXPLODER MET DEATH—Funeral services are held for industrial-exploider Marcel Lachapelle, in the French Pyrenees. His father, (above), stands weeping, a heartbroken groom to his fate. "I wish to see the body," says Lachapelle, leader of a rescue team, who killed death in a vain attempt to bring the cave-trapped miner to the surface. "I don't care if it was the last of my life," he said. Lachapelle was suddenly snatched and he fell 120 feet to his death.—Central Press Canadian.

HAVING TROUBLE WITH HIS HOTEL BILL—Among the regular patrons of Grace Fisher's "Song of the Sea" exclusive beach and restaurant at Capri on the Mediterranean, are the former Prince of Wales and his wife, Shearman, who are shown at their table. The former prince, who is believed to be financially "exhausted" and who insists on a "four man" suite more headliner courtesy through an argument over his Capri hotel bill.—Central Press Canadian.

The Sports Clinic

(An official department of Sports College)
Conducted by Lloyd "Ace" Percival

Is Length of Throwing Stride Important?

Throwing sports figure, that throwing in the technical of all baseball, is in fact and figure, in which the average person can stand the most important. One of the most important factors which govern the efficiency of your throw is the length of your throwing stride.

Actually the stride forward you throw your "ready to throw" position, when throwing a ball, is similar to, and as important as, the stride you use when you step forward from your "ready to hit" position. To make your throw, or place a target on the ground or 6 inches in front of you and a friend, try to make the stride as long as possible. The important thing to remember is that every throw has the same length of stride every time, if you don't you will be inconsistent and weak.

The ideal throwing stride is about 6 to 8 inches long, on check on the length of the throwing stride, you can see how close you are to this ideal position. Also have someone check your length to see if you take a different length of stride each time you throw. To develop an ideal stride, place a target on the ground or 6 inches in front of you and a friend, try to make the stride as long as possible, then step back and forth with a friend, try to hit the target, then step back and forth with a friend, then step forward and throw.

This sort of drill will soon get your stride into the proper groove. When you stride to step your loss are as much as 10 inches. To develop an ideal stride, place a target on the ground or 6 inches in front of you and a friend, try to make the stride as long as possible, then step back and forth with a friend, try to hit the target, then step back and forth with a friend, then step forward and throw.

Build for Next Track Season
The next few months can mean the difference between a mediocre season and a top season. To get the best out of your season, you must build for the next season.

World Happenings

Briefly Told

The City of Ottawa has announced that it will be holding a "World Happenings" festival in 1953. The festival will be held in the city's main park, and will feature a variety of international performances and exhibits.

A 10-year-old shepherd in Kananis, British Columbia, has been awarded a prize for his dog, which has been found to be the best of its kind. The dog is named "Buster" and is a Border Collie.

W. Wallace, pilot of Britain's first jet-propelled car, has been awarded a prize for his car, which has been found to be the best of its kind. The car is named "Jetcar" and is a jet-propelled car.

Shooker's carveries were responsible for more fire in Saskatchewan in 1952 than any other cause. The carveries were found to be responsible for 372 fires, with a damage of \$17,000. The provincial fire commission's report stated.

Norway is trading furs for prunes. The Norwegian government has announced that it will be trading furs for prunes. The furs are being traded for prunes, which are being used for the fur trade.

When Miss Chuan Chen, Chinese student at the University of Alberta, goes home her refrigerator will be waiting. Miss Chen ordered the refrigerator shipped to her home in Bangkok. She said American refrigerators in Thailand are too expensive.

On The Side : E. V. Durling

In Paraguay, introductions are unnecessary. If a man is attracted by a passing green-eyed blonde or a blue-eyed brunette, he approaches her and makes "love" without introduction. The women take no offense at this and do not intervene. "Yes," the man then says, "I have a proposition. If you will be my mistress, I will give you \$100 a month. If you will be my mistress, I will give you \$100 a month. If you will be my mistress, I will give you \$100 a month."

In Uruguay the law is that a working mother must give up her job for her baby before her child's birth and not for a month after. Her position is held for her. She is given half pay for the period. It is also a law that every employed woman must work until 20. Standing mothers who are allowed to remain. There they still think the female is the weaker sex.

Safety Cigarette Belts

An inventive idea for "safety" cigarettes has been developed. The cigarettes have a "safety" belt, which is a device that will prevent the cigarette from falling out of the mouth. The device is a "safety" belt, which is a device that will prevent the cigarette from falling out of the mouth.

Are the small fables the forgotten men of the ready-to-wear clothing industry? A subscriber writes that he has been told that there are 140 people who are in the ready-to-wear clothing industry. He says that he has been told that there are 140 people who are in the ready-to-wear clothing industry. He says that he has been told that there are 140 people who are in the ready-to-wear clothing industry.

More Time To Will Ask For Finish Highway

VICTORIA, B.C.—British Columbia can not possibly complete the portion of the Trans-Canada Highway by the target date of 1954, it was reported today.

Public Works Minister A. P. Gagnier is expected to go to Ottawa shortly to ask for an extension of the deadline.

British Columbia has barely started its 600-mile section of the highway, which is mostly through rough terrain.

The original agreement with the federal government called for completion in seven years and at a cost of about \$40,000,000.

Now the cost is estimated between \$60,000,000 and \$80,000,000. The job is expected to take two or three more years, said Gagnier.

The route of the highway would through country that has to be cleared of trees and brush. The route of the highway would through country that has to be cleared of trees and brush.

First Aid

First Aid is just what the two words imply, namely the first possible intelligent aid or help given to the victim of an accident or sudden illness. This aid is usually of a temporary nature only, to be given once, of the scene of the accident or sudden illness and before a doctor is available to assume responsibility.

ILLNESS CAUSED BY EXCESSIVE HEAT

Following exposure to excessive heat, the body frequently reacts in one of the following conditions: Heat stroke or Heat Exhaustion. Heat stroke is a serious condition, and the victim should be taken to a hospital immediately.

Normally, there is a definite heat reaction, but the body is not in a position to cope with the heat. The body is not in a position to cope with the heat. The body is not in a position to cope with the heat.

When a person works in a high temperature, sweating is the only way of keeping the body cool. When a person works in a high temperature, sweating is the only way of keeping the body cool. When a person works in a high temperature, sweating is the only way of keeping the body cool.
